

EVEN THE MOST QUIET, RELAXING PLACES NEED A QUALITY SOUND SYSTEM

EXECUTIVE SUMMARY

During the planning stages of an annual holiday party for their members, the GrapeSeed Spa at South Coast Winery Resort & Spa found themselves in need of a sound system to play music and engage with the members efficiently. An easy-to-use and compact, yet clear and powerful system was required in order to fit in the small event space and reach over the noisy crowd. Anchor Audio's Go Getter portable PA system with a wireless handheld microphone was the perfect solution for this event to be a huge success.

ABOUT

The GrapeSeed Spa at South Coast Winery Resort & Spa is a full-service spa located in Temecula Valley Wine Country in the heart of southern California. This three-story facility offers a variety of luxurious treatments, saltwater pool and whirlpools, and breath-taking views from the spacious veranda over-looking the rolling hills and vineyards of wine country. For local residents, an exclusive Spa Membership is available and includes unlimited spa facility access along with invitations to special member-only events throughout the year.

HOW THE GO GETTER HELPED THE GRAPSEED SPA

After researching several options and contacting other vendors, the GrapeSeed Spa found the customer service at Anchor Audio to stand out above the rest. In the process of selecting a sound system for the event, Spa Director Millay Dimond "explained what [she] needed the system for, and the rep gave [her] even more ideas for future use!" After that, the decision to go with the Go Getter Basic Package was final.

According to Dimond, they had a "seamless" experience with the Go Getter on the day of the event, emphasizing that "set up was so easy!" It was quickly and easily set up in a small designated area of the spa lobby, completely free of any wires for party guests to trip on. Throughout the evening, the Go Getter was easily and frequently switched between streaming music from a phone through the built-in Bluetooth to making announcements and giving away raffle prizes over the microphone. When the event came to a close, the entire sound system was taken down and packed up in a matter of moments.

RESULTS & REVIEW

The GrapeSeed Spa is extremely satisfied with their Go Getter - giving it "five stars!" Knowing Anchor Audio's customer service is readily available if there are any concerns played a huge factor in selecting their system, and after putting it to use, Dimond stated that "[the Go Getter] is such a high-quality speaker, we didn't have to worry about any issues at the time of our event." They are happy to recommend the Anchor Audio Go Getter Portable Sound System to anyone in need of a compact, wireless, easy-to-use, and powerful sound system.
